

Services of PPDC, Agra

The MSME Technology Development Centre (PPDC Agra) offers an extensive array of high-impact services meticulously crafted to address the multifaceted needs of Micro, Small, and Medium Enterprises (MSMEs), as well as industrial stakeholders and aspiring professionals. These services are strategically aligned with contemporary industry standards and technological advancements.

1. Process and Product Development

PPDC Agra specializes in providing comprehensive Process and Product Development support to Micro, Small, and Medium Enterprises (MSMEs) via advanced Foundry, Conventional and CNC Machine Shops, Plastic Injection Molding Machines, PET Stretch Blow Molding Machines, 3D Scanner, and 3D Printers for additive manufacturing.

This service helps industries improve their manufacturing processes, enhance product quality, and develop innovative solutions for market competitiveness.

2. Training

PPDC Agra conducts Skill Development and Technical Training programs designed to upskill individuals and professionals in the latest industrial technologies. These programs cater to a wide range of sectors including mechanical, electrical, electronics, and IT domains.

3. Testing

PPDC Agra offers specialized Metal Testing Services through its well-equipped material testing laboratories. These services help industries validate the quality and properties of metal components used in various engineering applications.

4. Consultancy

PPDC Agra provides Consultancy and Third-Party Inspection Services under NSIC (National Small Industries Corporation) schemes, Lean Implementation in MSME Units etc. These consultancy services help MSMEs build credibility, enhance product quality, and gain better access to government procurement opportunities.
