

Vision & Mission of PPDC, Agra

Vision

To evolve into a preeminent Centre of Excellence that catalyzes sustainable industrial growth and fosters technological innovation among Micro, Small, and Medium Enterprises (MSMEs). Through a commitment to capacity building, skill development, and knowledge dissemination, we aspire to empower Indian MSMEs to achieve global competitiveness and resilience.

Mission

- To equip MSMEs with state-of-the-art technological solutions, contemporary training modules, and expert consultancy to drive productivity and innovation via advanced Foundry, Conventional and CNC Machine Shops, Plastic Injection Molding Machines, PET Stretch Blow Molding Machines, 3D Scanner, and 3D Printers for additive manufacturing.
- To spearhead research and development initiatives that facilitate the creation of novel products, processes, and manufacturing techniques.
- To cultivate a skilled and future-ready workforce by delivering industry-relevant, high-impact skill development programs aligned with national and global standards.
- To act as a strategic implementing agency for Government of India schemes and initiatives aimed at the advancement and support of MSMEs.
- To bridge the gap between academia and industry by promoting collaborative learning, innovation hubs, and entrepreneurship development.
- To enhance the socio-economic fabric by promoting inclusive development, particularly among underserved regions and vulnerable youth.
